

## Speedread now offers EXPANDED Read Hosting & Service!

Speedread can now host (collect, store, and monitor) your meter reads and deliver them to you automatically. No software is required.

System audits, replacement parts, and on-site maintenance are available directly from Speedread.

There are 4 ways of receiving your reads:

1. Daily email – contains 1 file with previous day reads
2. Web access – logon whenever you need reads; all daily reads are stored for access.
3. Dropbox or Google Drive - install a small app on your PC and the daily read file will sync in a folder automatically each day on your PC.
4. Upload to FTP

Several export file formats are available, custom formats may be available (setup fee may apply for custom).

Reads can be used to bill residents in house or in parallel with a 3<sup>rd</sup> party billing company\* for monitoring purposes. This makes it easy to spot check for high usage and potential leaks much quicker.

Reads and Service for all Miltel/Speedread/Cereniti systems with collector and modem or Internet Gateways (LAN, Wi-Fi, or GPRS), plus many other brands of AMR equipment and meters.

Call 317-824-4544 or email [info@speedreadtech.com](mailto:info@speedreadtech.com) today for more details and rates, also ask us about converting your modem system to Internet Gateways.

\*parallel monitoring with 3<sup>rd</sup> party billing may not be available on all Gateway systems.
